

Name: Rhiannon Chaffins

Webpage Choice and Explanation: For this project, I have chosen to build a portfolio website. I have chosen this type of website because it encourages me to explore and reflect on previous projects I have done and projects I would like to explore. My professional, educational, and personal goals include pursuing projects and activities that combine writing, content creation, and instructional design, and I believe building a portfolio website will be a good first step in showcasing and further pursuing these types of projects.

--	--	--

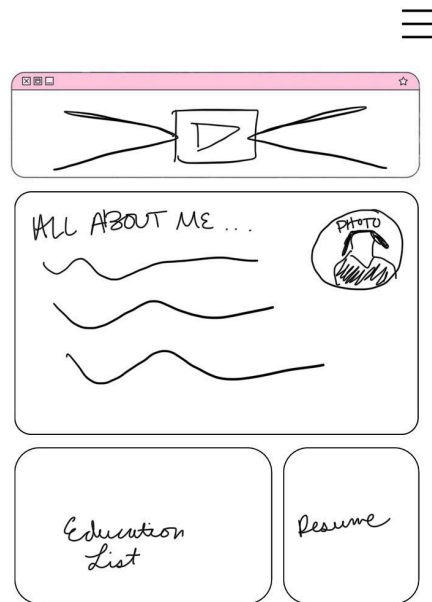

Explain your layout choice here for each. – I initially drew out a rough draft on paper of my initial ideas. I knew from the start I wanted something clean, but also fun. I chose these layouts as a means to create a fun and inviting atmosphere that is also well-organized and clean. My overall color theme for each page is a combination of varying shades of pink and purple, with a social media web page theme.

Explain your layout choice here for each. – Continuing with the webpage theme here. Each page holds the same elements in varying formats to better fit the varying sizes.

## Page Name Goes Here...MY WORK

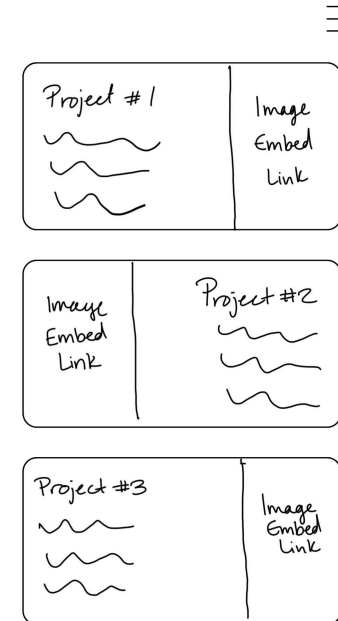

[Insert your Desktop Wireframe Screenshot/Image]

[Insert your Tablet Wireframe Screenshot/Image]

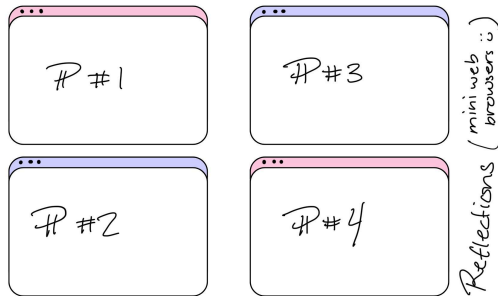

[Insert your Phone Wireframe Screenshot/Image]

Explain your layout choice here for each. – The goal for these pages was to put as much spotlight on my main project as possible. This is achieved through the use of larger icons for desktop and tablet versions, as well as being the first item on the phone version. Each section has a spot for embedding items or inserting images related to the project.

## Page Name Goes Here...REFLECTIONS

Explain your layout choice here for each. – Tying in the color presented at the beginning of the page, I opted for a fun and colorful end. For the footer, I intend to include social media icon/image links and my email, with a possible inclusion of my photo in between the two sections (using it as a logo). The final message is undecided at the moment and may vary according to the device.
